U.S. Patent Application No. 09/600,236
Reply to Office Action dated July 21, 2005

OCT 19 2005

PATENT
450106-02185**IN THE SPECIFICATION**

Please replace the Title as follows:

INFORMATION PROCESSING SYSTEM USING
REMOTE CONTROL, WITH DEVICE AND METHOD THEREFOR

Please amend the Abstract as follows:

A personal computer that is a controller transmits a reserve request for reserving a remote control. An MD recorder/player that is a target sets a reserve mode corresponding to the reserve request. ~~In other words, the~~ The MD recorder/player prohibits another controller from performing a remote control by another controller. In addition, the MD recorder/player prohibits local key operations other than reproduction keys, a stop key, and an eject key. Thus, only the personal computer can perform an operation control for updating ~~for example TOC management~~ information of the MD recorder/player. Thus, a mismatch of ~~TOC management~~ information due to a remote control of another controller and a local key operation can be prevented, ~~from taking place between the personal computer and the MD recorder/player.~~
